Due to the upgrade of [PSIMU](#) tool (V11.3), some slight modifications have been made necessary.
These modifications are mainly internal to **GENOPUS** and deal with:

Sommaire

- [1 Event management](#)
- [2 GPVisibilityFromStationDetector data read](#)
- [3 GPManeuverScenario and GPManeuverSequence I/F](#)
- [4 Bad Local time correction](#)

Event management

“**n, m, p**” event management, especially with maneuvers and attitude sequences have been modified.

GPVisibilityFromStationDetector data read

Problem linked to the `read()` method of the [GPVisibilityFromStationDetector](#) widget: some data was not correctly read.

GPManeuverScenario and GPManeuverSequence I/F

Some interface problems on [GPManeuverSequence](#) and [GPAttitudeSequence](#) classes led to internal modifications.

Bad Local time correction

Bad correction from [radian](#) to [hours](#) of the logger (12 hours offset) in the [CustomLocalTimeDetector](#) class.
